4. Neuroticism	55%
5. Openness	52.5%

Openness		52.5%
Conscientiousness		62.5%
Extraversion		57.5%
Agreeableness		62.5%
Neuroticism		55%

High (70–100)

The **Balanced Professional** — your personality profile reflects a well-rounded mix of traits, giving you adaptability across a variety of roles and environments.

Your profile is characterised by moderate balance across multiple dimensions. This suggests a versatile behavioural pattern, allowing you to adapt to both structured and unstructured environments as the situation demands. Your main challenge may be identifying which of your flexible skills to specialize in over time.

OCEAN Personality Assessment Report

Methodology & Limitations

MODEL Big Five / OCEAN	TOTAL ITEMS 50	ITEMS/TRAIT 10
SCALE 1–5 Likert Scale	TYPE Self-report	SCORING Deterministic trait aggregation and normalization

LIMITATIONS TO CONSIDER

- Self-report tendencies without normative comparisons (not a clinical assessment)
- State vs Trait variance (responses may reflect current mood)
- Lack of behavioral verification (reflects self-perception, not peer-rated performance)

Trait-Level Insights

OPENNESS — 52.5% (MODERATE)

Meaning: A balanced openness to experience, appreciating new ideas when they have clear practical value while valuing structure.

Implication: You may adapt well to both stable and changing environments, depending on the need.

CONSCIENTIOUSNESS — 62.5% (MODERATE)

Meaning: A generally reliable and organised approach, balanced with flexibility.

Implication: You are capable of focused effort when motivated and tend to meet most commitments.

EXTRAVERSION — 57.5% (MODERATE)

Meaning: A comfortable balance between social engagement and personal reflection.

Implication: You can work well in teams and independently, adapting your energy to the situation.

AGREEABLENESS — 62.5% (MODERATE)

Meaning: A cooperative and considerate approach, balanced with the ability to assert your own views when needed.

Implication: You may navigate team dynamics effectively, supporting others while maintaining boundaries.

NEUROTICISM — 55% (MODERATE)

Meaning: A generally stable emotional baseline with some sensitivity to stress in challenging situations.

Implication: You are capable of managing emotions effectively in most everyday circumstances.

OCEAN Personality Assessment Report

Career Suitability

Environments: Cross-functional environments that require versatility.

Why It Fits: Your balanced profile suggests you can adapt to a variety of roles without feeling strictly confined to one mode of working.

Potentially Compatible Roles:

Project Management

General Management

Account Management

Customer Success

Personality tendencies alone should not determine career choice. Consider your actual skills and interests.

Based on: Balanced / Generalist Profile

Learning Style

Structure: Versatile; adapts to the course format.

Pace: Moderate and consistent.

Feedback: Appreciates standard, constructive feedback.

Format: Comfortable studying alone or in study groups.

Stress & Coping Tendencies

Sensitivity: Moderate

Likely Challenge: Prolonged periods of high pressure may eventually drain your reserves.

Helpful Strategies: Proactive self-care and clear personal boundaries generally keep you functioning well.

Motivational Drivers

- Autonomy and self-directed growth

OCEAN Personality Assessment Report

Development Areas

Deepening Specialisation

Why it matters: A balanced profile means you are good at many things, but perhaps lack a singular standout trait.

Growth direction: Identify the one skill that brings you the most energy and deliberately over-invest in it.

Personalised Action Plan

1. Establish a Feedback Loop

Seek regular feedback from a trusted colleague or mentor to surface blind spots and validate your self-perception.

2. Define a 90-Day Growth Objective

Set a personal development goal tied to your career aspirations, review progress monthly, and adjust based on evidence.

3. Cross-Train a Skill

Spend two hours a week learning a skill outside your primary domain to capitalise on your balanced profile.

Summary

Test User's profile indicates strongest behavioural tendencies in Conscientiousness and Agreeableness. These insights suggest predictable patterns in how they work, lead, and communicate. However, personality is not fixed; awareness of these natural inclinations is the first step toward intentional growth and adaptive behaviour.

This assessment is intended for educational, self-development, and personality-awareness purposes only. It is not a clinical psychological diagnosis or medical assessment. Results reflect self-reported tendencies and should be interpreted as indicative patterns, not absolute classifications. Please consult a qualified professional for any occupational psychology or clinical needs.
